This is how it works For starters, Photoshop is best used as a program designed to allow users to make changes to images in order to produce desired results. The picture can then be saved with a variety of file formats that affect how the image is saved and stored. Photoshop saves an image in many different formats, ranging from Adobe's own Raw format to JPG, TIF, GIF, and more. The file format allows Photoshop to save the image in a specific resolution and quality level. Photoshop also saves the edited image as a new image file, which users can make copies of in order to prevent overwriting of old files. For example, if you create an image in Photoshop, you may be asked to save it as a JPEG, a GIF, a PSD, a BMP, or a TIF. Each file type has different qualities and characteristics that allow Photoshop to save your image in a different way. Photoshop layers enable users to draw in multiple colors, textures, and other elements that can be placed over an image with transparency. All the layers can be modified separately, which enables users to learn more about what layers and

masks do to images. Because Photoshop has multiple layers, users can edit each layer separately, which enables professionals to make changes to layers and create incredible effects without unintentionally altering other parts of the image. This is how it works There are also three fundamental commands in Photoshop that are used to modify photos. Users can perform these edits with the click of a button. Photoshop users have the ability to make the image brighter, create a different hue, change the contrast, tweak the amount of saturation, add and subtract layers, use masks, and more. Photoshop's features can be learned within several lessons that explain how users can use every tool in Photoshop. These tutorials take users through all the steps necessary to create various images and allows them to learn new, efficient ways to create images. With its very interactive workflow, it's important to remember that Photoshop users can create and modify images more easily and faster than images edited in many other programs. In one way, Photoshop helps those who need great pictures even when they don't know what they need a perfect picture of. By making it easy to create images and edit them, it's possible for even beginners to instantly create

images that stand out. Why Adobe Photoshop? Simply put, Photoshop is the industry standard because it has been used in the past for

. 1981), where there was a full trial and a finding that defendants failed to train the accountants properly. In this case, there was no determination of supervisory liability, and plaintiffs did not seek damages. If we determined that plaintiffs were entitled to a new trial, then we would be forced to reopen the record and find with respect to supervisor liability. 30 Appellants sought damages at trial, and the verdict cannot stand. The only remaining issue is that of costs. Defendant waived all other costs, and plaintiffs' counsel must pay defendant's costs. 31 The judgment below is **REVERSED** and **REMANDED** for further proceedings in accordance with this opinion. 32 **McKAY**, Circuit Judge, concurring in part and dissenting in part: 33 I respectfully dissent with respect to the reversal of the judgment for costs. The majority opinion states the issue this way: 34 The only remaining issue is that of costs. Defendant waived all other costs, and plaintiffs' counsel must pay defendant's costs. 35 The plaintiffs are entitled to their costs on this appeal. It is true that this court has very

clearly indicated that the costs of a prevailing defendant on a civil rights action should not be assessed against a prevailing plaintiff under our Circuit's Rule 26(c). (However, no injunction against such assessment has ever been sought.) It is also true that, in holding for the plaintiffs, this court has in effect ignored that principle, in effect ordered the plaintiffs to pay their own costs. 36 That we have been required to do so is clear from the fact that we have determined that the plaintiffs were not guilty of "frivolousness" or "wilfulness." I can see no escape from that requirement when we have made such findings and remanded the case for further proceedings in part because the plaintiffs may not have received a full trial, and in part for the purpose of determining for the first time whether the plaintiffs were entitled to summary judgment. 37 This action was brought by these plaintiffs as a part of a class action case wherein the broad allegations of the complaint were abandoned. The plaintiffs did not seek to enjoin the future conduct complained of. As the plaintiffs themselves recognized in their formal response to the defendant's motion for summary judgment, the only thing at issue was whether the constitutional and statutory violations they had

alleged in the original complaint had taken place, and if so, the
