Imagine receiving a detailed and clean feedback document, but to incorporate the document into your designs, you need to recreate the original. No longer: You can import feedback directly from paper or PDFs, saving time and effort. Import documents as BMP, JPG, PNG, or TIFF. You can quickly create new markup: Make new text with all parameters and styles. Use the option to automatically start from an existing font. Import text directly from a web page or from a Google search. Importing screenshots and images to mark up your drawings no longer requires having a photo editor. Instead, you can use the AutoCAD graphics engine to automatically create pixel-level annotations. Work with annotations on your drawings. Mark up objects with the new AutoCAD text widget. There are no limitations in size, position, or type of text. See the annotations and the surrounding context. Use Autodesk BIM 360 in AutoCAD 2023.
