On the very day he begins to attend class, Tarnished meets his childhood friend, a

girl named Miria who lives in a parallel world and was also deemed unworthy of the entrance exam. Miria is also attending a school on the Lands Between, but it is suspicious that the uniform on her school desk and the box she opened belonged to a certain one. The main character of the game is Tarnished himself, and he leads Miria and a girl named Welle to a certain place: an immense four-dimensional dungeon. The Dungeon As time passes, Tarnished succeeds in his journey with the help of the girl named Welle, and finds himself and Miria in a unique place. If you should happen to fall into this labyrinth, you will encounter a number of monsters. As you fight these enemies, you can obtain items and materials that help you. After completing certain conditions, you can even obtain your arms and legs as companions that can be used in combat. However, it is difficult to collect the materials necessary to create such items, so you will need to meet other players and trade your items with them. There are also users who have

the skill to create powerful items that will help you fight the monsters. You can even accept quests from these users. As you progress further in the dungeon, you can enter places that are three-dimensional and where the music and the items you collect change. Through such changes, the story naturally unfolds in unexpected ways. World Exploration As you explore the dungeon, you will come across numerous places and dungeons that are three-dimensional, so you can freely explore by jumping up and down. You can enter the parallel world where the story begins, which is a huge four-dimensional dungeon
