The Q: Is it possible to create a java jar with an embedded server? I have a java desktop application which has a server embedded to it. The server is developed using jersey. Now, I want to convert the desktop application into a jar file so that I can deploy it on the client's computer. The client has to run the jar file along with some additional dependencies. Is it possible? A: To my knowledge, there is no standard way to embed a server, or any other non-JVM portion of an application, into a jar file. One alternative is to run your application (as a server) while it is deployed to the client. EDIT: At some point in the future, JavaFX is supposed to support embedded engines, allowing java applications to use the JVM as an embedded engine. A prospective, randomized trial of a cuffed and a conventional endotracheal tube in a canine model of catecholamine cardiomyopathy. The incidence of endotracheal tube cuff pressures exceeding 20 cm H2O has increased to 65% in the last decade. We examined the cardiovascular effects of hyperinflation of a cuffed endotracheal tube versus a conventional endotracheal tube. Two groups of 18 mongrel dogs were studied. Group 1 received a cuffed tube, and group 2 received a conventional endotracheal tube. Both groups received infusions of lidocaine and L-epinephrine for 2 hours. Tracheal tube cuffs were inflated to 30, 40, and 50 cm H2O in group 1, and 45 cm H2O in group 2. Blood pressure, heart rate, electrocardiogram (ECG), and respiratory rate were measured before and after the procedure. Cardiac output and stroke volume were determined by transpulmonary thermodilution. Cardiac index was corrected for body weight. End-tidal carbon dioxide was determined with a capnograph. The survival time in group 1 and 2 were 43.0 +/- 3.0 and 42.7 +/- 2.6 minutes (mean +/- SEM), respectively (p = NS). A mean cuff pressure of 50 cm H2O in the cuffed tube was associated with significant bradycardia and decreases in cardiac output and stroke volume. A mean cuff pressure of 45 cm H2O with the conventional tube resulted in a significant increase in heart rate and a decrease in cardiac
